## CORBIN @ FENG SHUI BUSINESS HOTEL

Consistently based on the principles of Feng Shui, the Corbin is furnished with light colors and natural materials. Build in 2003, it combines modern architecture with ancient Asian Feng Shui elements. Manfred Setzer's team designed most of the furniture, which was custom made by local craftsmen. The facade is a combination of wood and concrete featuring green and red surfaces. All 46 radiation-free rooms provide a healthy atmosphere and a sheltered space for sound sleep. The entrance and the lobby are equipped with high-tech fountains as design elements and as air refreshers. Simplicity is the main theme with no paintings in the rooms and no frills in the public areas - the pure essence of living.
